

Name of Website:

MAVDOG K-9 Training

Description:

This website I am designing will be used for my father's dog training business, in which he provides professional dog training services, helps dog owners build a better relationship and having more obedient, well behaved pets.

This website will allow owners to get more info about the dog training as well as a way to book training or boarding services. People who visit the website will learn about different services, my dad's qualifications, and how my dad may train their dog. The website will feature a gallery of client reviews, potential pricing, gallery of dogs trained/dog training videos, and contact information. The main goal of this website is to acquire more clients as well as boost the credibility of the business.

Page Names:

1. Home
2. About Us
3. Services
4. Pricing
5. Testimonials
6. Gallery
7. Contact Us
8. FAQs

Data:

The Website will store info about each of our services, such as the name, description, duration, and pricing.

Testimonials from past clients will be saved, which may include their name, the dog name/breed trained, and their review. The Gallery page will store images of dogs, and videos of training as well as captions. The Contact page will include business phone number, email, and operating hours.
